

# Elevate your Defense Security with DISP Certification

---

Navigating the stringent requirements of the Defence Industry Security Program (DISP) can be a challenging task for businesses within the defence sector. At Perigon One, we specialise in guiding your organisation through the certification process, ensuring full compliance with national security standards and enhancing your overall security posture.

# Why DISP Certification Matters:

Achieving DISP Certification is crucial for businesses that handle sensitive defence information. It not only demonstrates your commitment to high-security standards but also positions your organisation as a trusted and reliable partner in the defence industry. With DISP Certification, you gain a competitive edge, opening up new business opportunities while safeguarding your valuable data.

- 1 Enhanced Security Posture:**  
Achieving DISP Certification significantly improves your organisation's security measures, protecting sensitive information and reducing the risk of breaches.
- 2 Regulatory Compliance:**  
Our service ensures full compliance with DISP requirements, helping you avoid potential fines and legal issues associated with non-compliance.
- 3 Competitive Advantage:**  
Being DISP Certified positions your organisation as a trusted partner in the defence industry, enhancing your reputation and opening doors to new business opportunities.
- 4 Employee Awareness and Engagement:**  
Our training programmes increase security awareness among your staff, fostering a culture of vigilance and responsibility.
- 5 Peace of Mind:**  
With our continuous monitoring and support, you can focus on your core business activities, confident that your security and compliance needs are in expert hands.

## Key Features of our DISP Certification:

- 1 Initial Consultation and Assessment**  
We start with an in-depth consultation and conduct a thorough security review to identify gaps.
- 2 Compliance Roadmap and Implementation**  
We develop a customised roadmap and work closely with your IT staff to implement necessary security measures.
- 3 Policy Development and Training**  
Our experts assist in creating security policies and conduct comprehensive training for your employees.
- 4 Continuous Monitoring and Audits**  
We deploy advanced monitoring tools and perform regular audits to ensure ongoing compliance.
- 5 Incident Response and Certification Support**  
Our team manages incident response and supports the entire certification process, including audit preparation and documentation management.
